Agenda

- Overview of Project - Debra Hernandez, SECOORA
- Surfline Involvement - Mark Willis, Surfline
- Various Applications of Camera Data
 - Wave Run Up - Joseph Long, USGS
 - NOS and NWS Rip Currents and High Tide Flooding - Greg Dusek, NOAA National Ocean Service
 - Human and Animal Use Data - Dwayne Porter, USC
- Questions

WebCAT Project

- Funding by NOAA NOS and IOOS
- One Year Project
- Meet the needs of:

Preparedness and risk reduction

Safe and efficient transportation and commerce

Stewardship, recreation, and tourism

5 CAMERAS TO
BE INSTALLED

1 YEAR OF
DATA

**ALL DATA TO BE AVAILABLE
ON SECOORA WEBSITE**

PORTAL.SECOORA.ORG

SECOORA

Southeast Coastal Ocean Observing
Regional Association

Accessing the Camera Data

- Video data will be processed nightly by SECOORA and made available the next day (cameras record about 5am to 9pm)
- Data will be available in one hour lengths and will be downloadable / watchable from the [SECOORA Portal](#)
- Data will be available through the SECOORA Research Workspace for analysis using Python and R through Jupyter Notebooks.
- Axiom is working on special-case data lengths and formats - ie "a week long video of the top 10 minute of each hour" or "the 10 minutes surrounding the highest and lowest tides for the day"

Question to Audience: What format do you find useful for analysis?

Unique Partnership

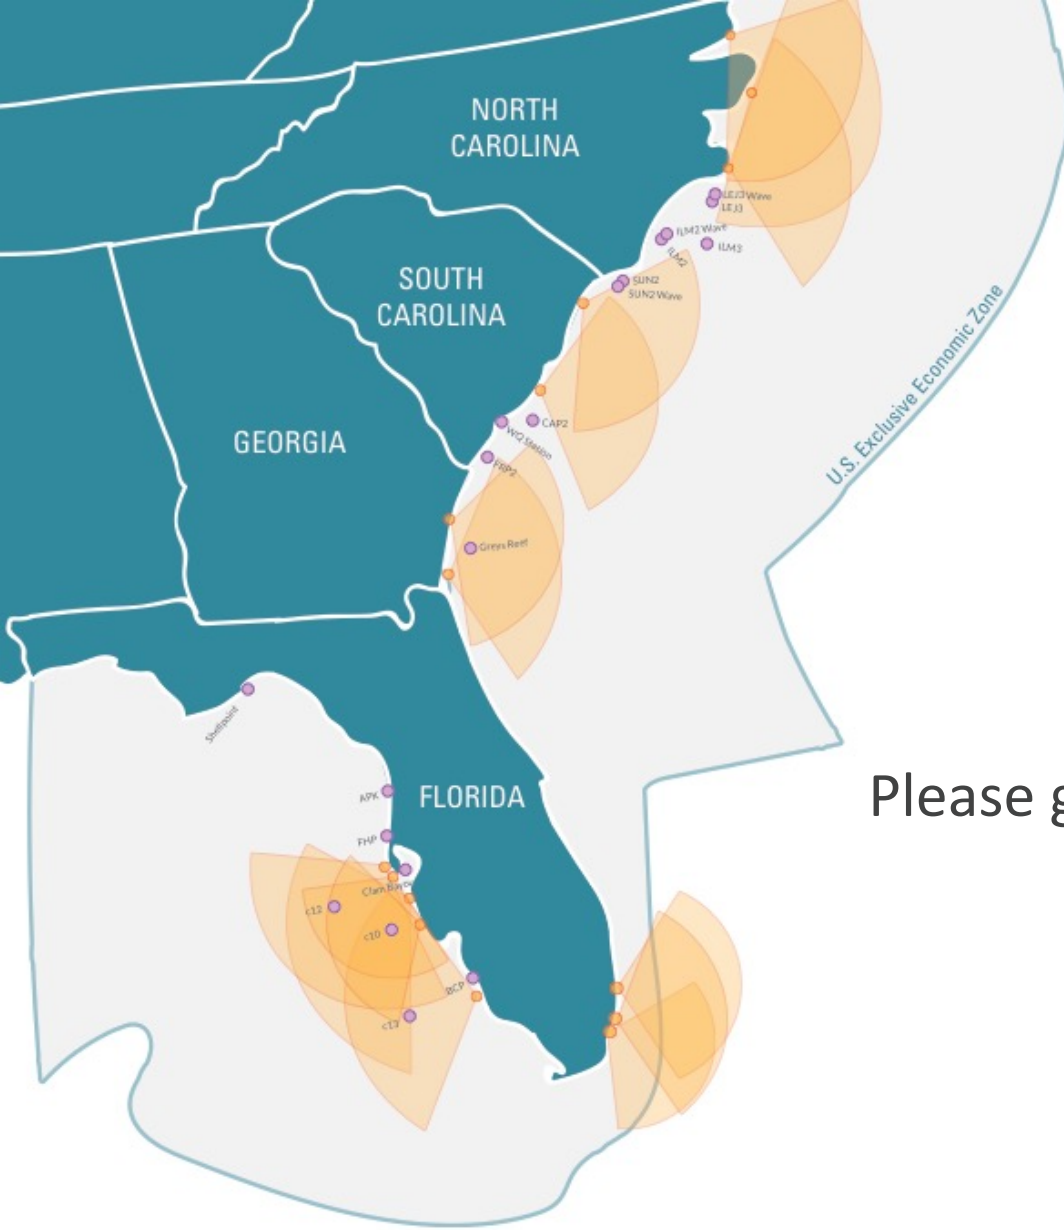

Public-private partnership leveraging the expertise and capabilities of private, nonprofit and public sectors.

WebCAT Workshop

- Announcement coming early 2018
- Exploring applications, opportunities and challenges to using webcams for environmental monitoring
- Focuses on use cases of camera data
- Audience will be resource managers

Stay tuned for an announcement!
