

# Free Public Forum at University of North Carolina Wilmington Hurricanes and Climate: What does the data show?

**Catherine Edwards**

Skidaway Institute of Oceanography at University of Georgia

Catherine Edwards is a physical oceanographer at Skidaway Institute of Oceanography and in the Department of Marine Sciences at University of Georgia. She earned a BS in Physics with highest honors from the University of North Carolina at Chapel Hill, and after a stint as an ocean modeler for the US Naval Research Laboratory, she earned a PhD in Physical Oceanography, University of North Carolina at Chapel Hill. With programs funded by the National Science Foundation, the Gulf of Mexico Research Initiative, NOAA, and the Navy, Edwards's research focuses on answering fundamental questions in coastal oceanography and management with autonomous underwater vehicles, as well as optimizing their use with engineering principles and real-time data streams.

**Monday June 17, 2019**  
Doors open at 6:15 PM  
Forum begins at 6:30 PM

**University of North Carolina  
Wilmington - Center for  
Marine Science Auditorium**  
5600 Marvin K. Moss Lane  
Wilmington, NC 28409
