

FAST FACTS

The FACT Network

Joy Young, PhD

Overview: The FACT Network

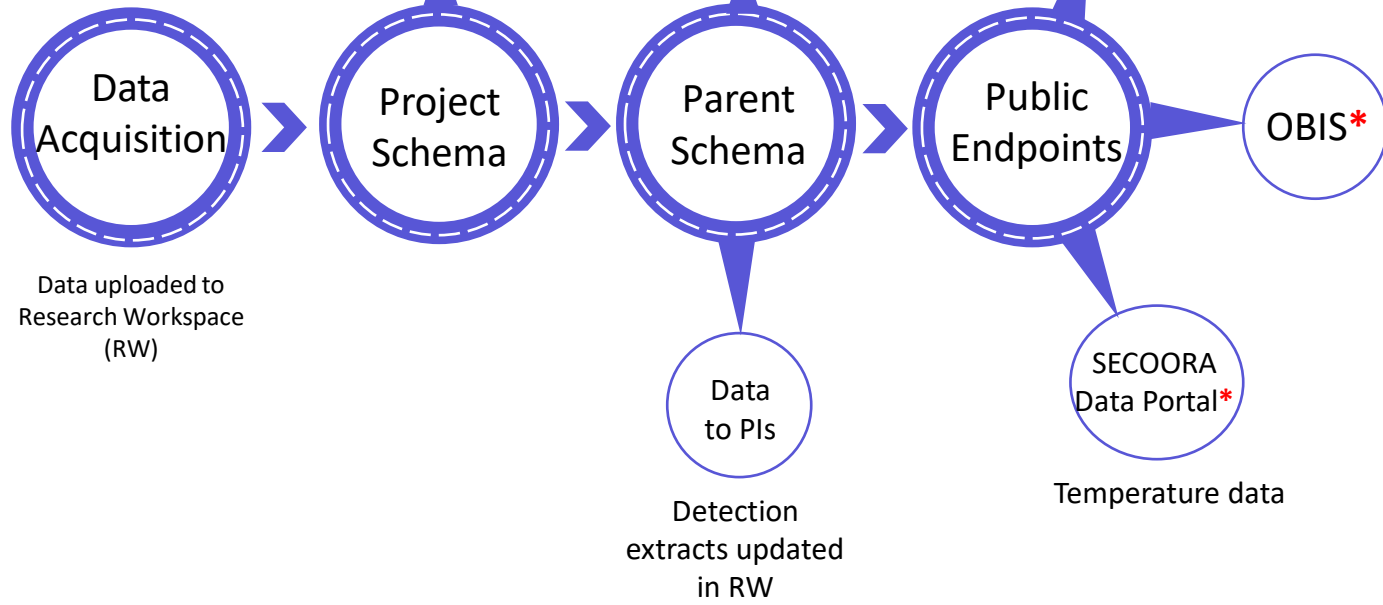

The FACT Node

Total detections: 316 million
154.7 million matched to animals

Tags: 10,264 (total)
3,375 (active)
Species count: 132

Stations: 2,614 (total)
1,196 (active)

Project count: 191
Researchers: 302
Institutions: 61

Detections are crossmatched within the node, between compatible nodes, and with partner nodes

Discretionary. Project metadata and station information.

Looking Ahead

Internally:

- **Culture and Growth:** Continue to nurture and expand our organizational culture and programs.
- **OBIS Publication Policy:** Finalize a network-wide policy for publishing data in OBIS.
- **GeoServer Development:** Enhance and expand our GeoServer capabilities for better data management and accessibility.
- **Strategic Plan Implementation:** Refine and implement our strategic plan to align with current and future objectives.
- **Brand Update:** Introduce a new logo to refresh and modernize our visual identity.

In Partnership:

- **Offshore Wind Collaboration:** Work with partners to establish best practices for offshore wind energy projects.
- **Global Open Data Survey:** Conduct a global survey to gauge perceptions and effectiveness of open data practices.
- **Fisheries Symposium Organization:** Plan and organize a symposium at the American Fisheries Society to share insights and advancements of regional acoustic telemetry networks with the broader scientific community.
