

SECOORA

Technical & Programmatic Introduction

Thursday, October 10, 3:30 - 4:30 PM

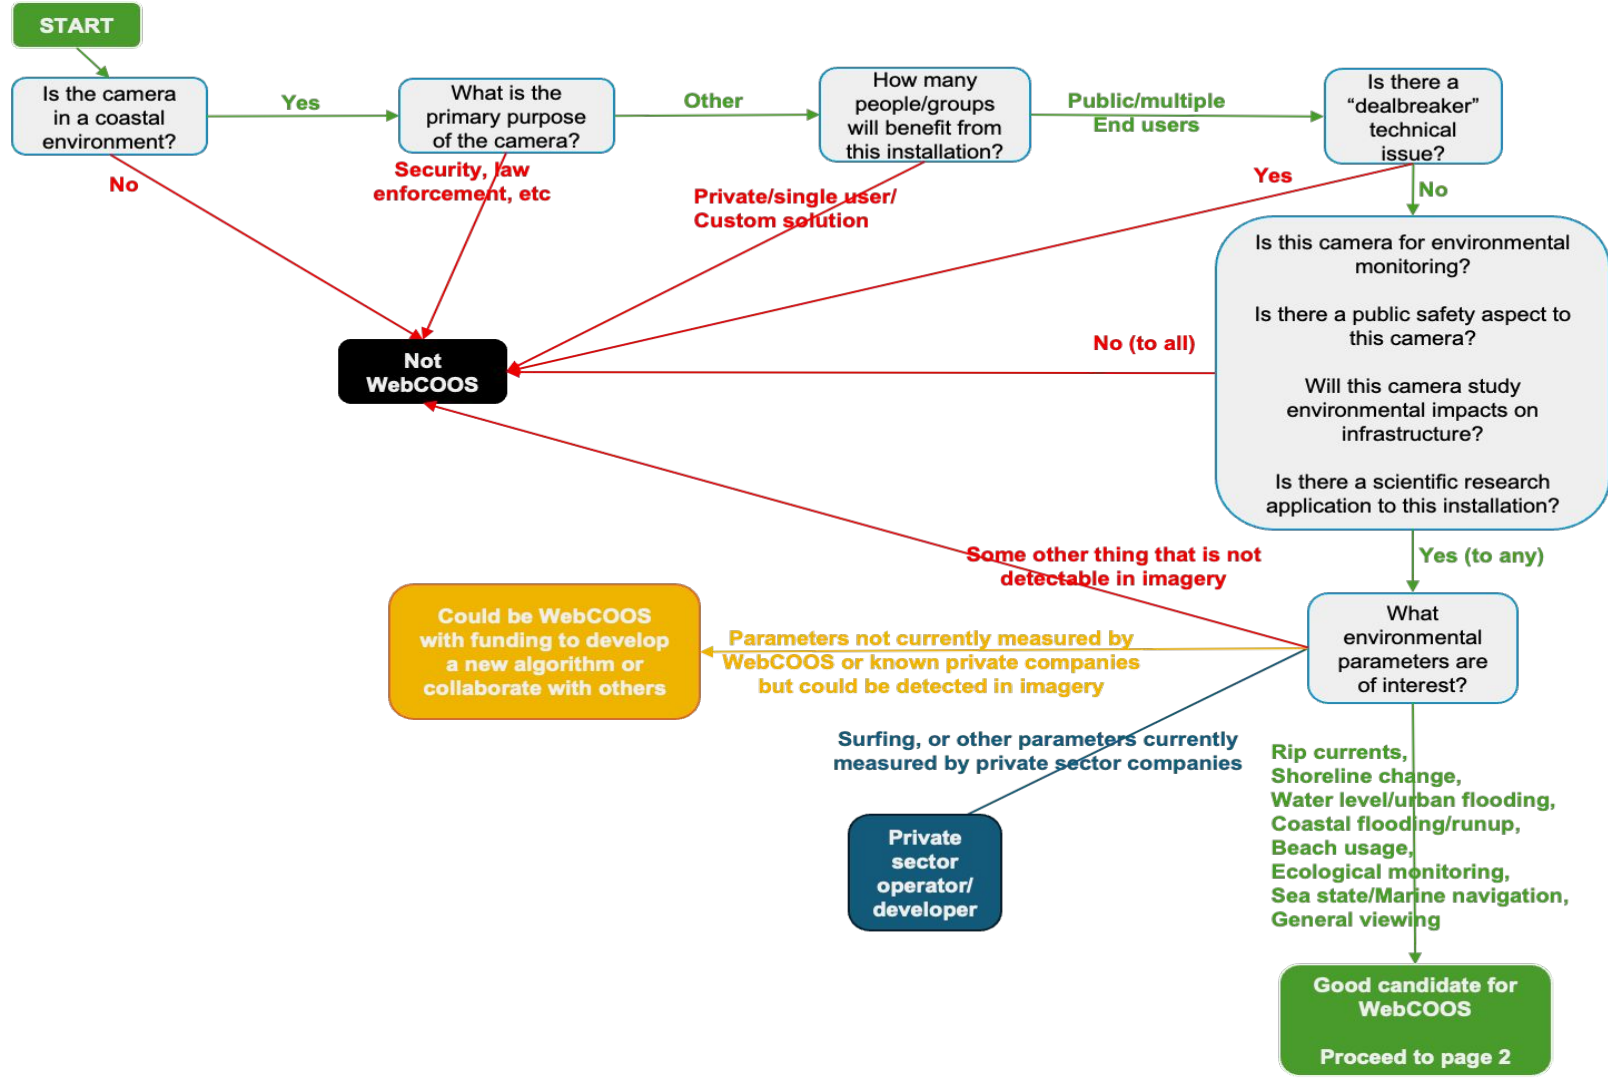

Programmatic considerations:

Greg Dusek

Debra Hernandez

- Federally funded project
- 'Public good' test applies
- Draft of a 'decision tree'
 - Paper version in workshop materials
 - Some decisions will be made collectively

From page 1:
Good candidate
for WebCOOS

Determine what we can afford to spend, and how do we decide how to spend DAC funding?

1st come 1st serve doesn't seem equitable.

How to determine funding from other sources than OTT/IRA?

Programmatic considerations

Technical considerations

- Is this in a location currently not covered by the WebCOOS network?
Yes No
- Is the location in an underserved community?
Yes No
- Is there a partner or group of partners interested & invested in maintaining /sponsoring camera?
Yes No
- What funding is available for this camera?
Sufficient Insufficient

- Are there privacy concerns that might complicate storing and disseminating imagery?
Yes No
- Is there existing power, internet, and infrastructure available for installation?
Yes No
- Would the hardware/software/network be the same, similar, or different from existing cameras in the WebCOOS network?
Same Similar Different
- Have connection and integration already been solved for this installation type?
Yes No
- How much data/bandwidth is required for the application of interest? (snapshots, full videos, etc.)
Little Much
- Is the proposed installation in a protected/critical habitat/endangered species/historic building/ etc area? (How easy will permitting be?)
No Yes

More benefits Fewer benefits Fewer challenges/costs More challenges/costs

Assign priority for ingestion
